

WELCOME TO REDWOOD AREA SCHOOL DISTRICT'S FAMILY/STUDENT ACCESS

This system provides a valuable web-based tool for parents, guardians, and students to view information such as assignments, grades, attendance, etc. The system also acts as a two-way communication tool for teachers, students, parents, and guardians.

PARENTS: This area is reserved for any present or future information to be addressed by the school district.

We are excited to see the tremendous response with our new Skyward Family Access system. The feedback from parents and guardians using the system has been very positive. Since the inception of Family Access, we would like to identify two points:

1) We recommend to you that district expectations have been identified for our teachers that were outlined on your Skyward parent application form. For Middle School and High School only: It is understood that teachers are allowed ten (10) school days to post grades *after receiving* homework and tests from students. Teachers are not required to enter assignments prior to grading. Please refrain from contacting teachers about assignments not yet graded in Skyward. However, DO continue to contact teachers when questioning status of assignments.

2) Encourage your friends and neighbors to sign up for the Skyward Family Access system. Many parents are on board and we hope to eventually have 100% of our parents using Family Access.

To receive a login and password, click on the link below to print an application. Return or mail the application to the District Office.

For answers to common questions regarding Family/Student Access, please [click here](#) to view the FAQs web page.

Please note: Parents have the capability of entering or changing their email addresses online. This is extremely important for those parents who would like to receive email communications from their student's school.
